COMBO SPREADERS

800mm Wide floormat

Coombridge & Alexander Ltd

AGRICULTURAL MACHINERY MANUFACTURERS

SAM Combo Spreaders (800mm Wide floormat)

- The 800 mm wide floormat will handle a wider range of fertilisers, including urea, superphosphate and lime from rates as low as 40 kg per hectare to highs of 3500kg per hectare. The 800 wide mat will also handle most poultry and pig manures with ease. Products like gypsum can also be spread with this machine. The bin has been designed with high vertical sides to eliminate any bridging that may occur.
- The 5 and 6 Tonne models feature the new polyethylene bin that is standard in all our 400 mm mat spreaders. Capacity differences between the two sizes is achieved by the addition of laminated timber tophat boards, of 120mm and 240 mm.
- The large 8 Tonne combo is now the only steel bin spreader that we manufacture. Due to the size of the bin the 8 Tonne has the larger 13mm high tensile chain on the floor mat.

- The Combo range still incorporates all the features that have made SAM SPREADERS so reliable and easy to use, including :

- 9mm 2ply rubber mat
- high tensile snig chains under the mat to eliminate slipping
- hydraulically driven twin 600mm discs
- hydraulic automatic clutch to engage and disengage the floor mat
- stainless steel guard on floor drive chain
- superior paint system using two pot epoxy topcoat

SAM Spreaders (400mm Wide floormat)

- See our separate brochure for our range of 400mm wide floormat machines

Accessories Available

- Cover and frames
- Swivel Couplings
- Larger Tyres
- Remote Tandem Axle Greasing
- Brakes on two front hubs of tandem
