

# FEED WAGONS

Strong. Simple. Smart.

+64 7 847 8492

Simple to use  
and maintain

Smart design  
Smart technology

Mega reliable  
Built to last

12 cube tandem-axle, chain side-feed

10 cube tandem-axle, centre-feed

10 cube tandem-axle, chain side-feed  
Both shown on 400/60 x 15.5 tyres (an upgrade)

Each machine provides an even flow of feed with excellent throw. They handle a large range of feed types including; silage, maize and palm kernel.

NZ Made  
Since forever.

# Reliability plus.

**SAM Feed Wagons are built tough for lasting performance. Complexity is engineered out to ensure they are strong, reliable, and easy to use and maintain.**

## Models

- 10, 12 and 15 cube models make up the range. Choose either a low maintenance stainless chain side-feed or a simple centre-feed delivery. All side-feeds come with mudguards.
- Long-life teaser bars with individually welded teeth are designed for optimal grab and lift. They last better and are great for grass silage. High-tensile calibrated chains are used throughout for strength.
- The chassis has been designed with ample clearance from the ground to save bellying out in varied terrain. Stainless sides and fronts cut out rusting.
- Adding smart load weigh scales gives an accurate measure of the weight of feed in the bin and can be zeroed at any time. An App for Bluetooth viewing on your mobile is also available.

## Optional extras

- Load weigh scales (simple, electronic weighing of feed quantities)
- Remote tandem-axle greasing (saves time and effort) included on 12 and 15 cube models
- Hydraulic side-shift kit extends side-feed by 250mm for greater reach
- Belt side-feed conveyors (can reduce noise)
- Brakes available for tandem-axle (located on front hubs)
- LED lights and hazard panels for on-road use
- Heavy duty swivel coupling is included on 12 and 15 cube models and an option on 10 cube model. If using a Quick Hitch, a ball is not required and a skid can be added.
- 400/60 x 15.5 tyres are standard on a 12 cube and an option on the 10 cube model.

Our SAM range is backed by a quick and efficient support service from central Hamilton. The team are also available for technical help should you need it.

All Feed Wagons go through rigorous quality testing. They also have a comprehensive warranty. We deliver quality products and stand by them.

## Smart features

### Stainless chain side-feed

A stainless chain side-feed conveyor comes standard. The 25mm conveyor bars provide a positive directional flow for a range of feeds. Heavy roller chains eliminate tracking issues with less maintenance requirements. They are built to last. Belt side-feeds are also available.

### Superior finish and stainless sides

Shot blasted, primed and two-pot paint finish coated chassis gives superb corrosion resistance for the long-term. Stainless front and sides also cut out rusting.

### Trans-Tex deck flooring

Standard on all SAM Feed Wagons, Trans-Tex 22mm is a high-strength ply timber. Recognised for its high bending stiffness and high-impact resistance in the trucking industry. These decks are constructed for longevity.

### Smart weigh-scales

Adding smart load weigh scales provides simple, electronic weighing of feed quantities. A fixed Iconix FX15+ display unit is supplied with all SAM machines fitted with weigh scales. They can be retrofitted. A Bluetooth App is also available (Android only).
