**Proudly  
NZ Made**  
Since forever.

# Easy to use. Built to last.

**A SAM Quick Hitch provides simple coupling from the cab of the tractor across a range of trailed implements - saving you time.**

This Quick Hitch stands unsupported (when not in use) allowing quick alignment. No unnecessary manual lifting is required.

Once connected to a three-point linkage, you have a clear view of the tow-pin from the tractor cab. This ensures an easy pickup every time.

Fully welded construction means it is engineered for safety, strength and durability. SAM Quick Hitches are suitable for a range of trailed implements for example Feed Wagons and Trailers.

Two tow-pin sizes are available and can be easily changed out if required. The larger pin is always recommended in the first instance for strength. SAM Quick Hitches are suitable for trailed implements up to 15 tonnes (with larger pin).

## Optional extras

- We can easily replace the tow eyes on your implements to fit the larger, stronger 40mm pin.
- A skid can be added to your implement.
- A tow ball plate is also available for the Quick Hitch if you need it.

## Superb back up

Our SAM range is backed by a quick and efficient support service from central Hamilton. The team are also available for technical help should you need it.

All SAMs go through rigorous quality testing. They also have a comprehensive warranty. We deliver quality products and stand by them.

## Smart features

### Excellent view

Excellent view of tow-pin and safety latch for safe loading and unloading.

### Built for strength

Fully welded construction means the SAM Quick Hitch is engineered for safety and strength.

### Simple safety latch

An integrated safety latch secures over the tow-eye to lock. CAT-2 lift-arm and top pins are provided (fully replaceable lift-arm, top pins and linch pins).

### Different pin sizes

Two tow-pin sizes are available and can be changed out easily. The standard is 40mm designed to work with a 50mm eye on the implement coupling. While the 32mm pin works with a 37mm eye on the implement coupling.

### Tow ball plate (optional extra)

A versatile tow ball plate simply slides on and off the tow pin. It is bolted into place.
